2019 Novel Coronavirus Fact Sheet for Screening Patients at Healthcare Facilities

Issued: 2/11/2020

Patient Screening

All lowa healthcare facilities should implement screening procedures before or at patient check-in.

Screening questions:

- 1. Do you have a fever and respiratory symptoms (e.g., cough or difficulty breathing)?
- 2. Did you travel to China in the 14 days before you got sick OR did you have contact with someone with possible 2019-nCoV in the 14 days before you got sick?

If the answer to both screening questions is yes, and

- If screening was conducted before the patient presented for care, direct the patient to don a surgical mask and enter the facility through a private entrance (if possible).
- If the screening was conducted at patient check-in, direct the patient to don a surgical mask and do not allow the patient to sit in the waiting room.
 - Immediately direct the patient to an exam room or another well-ventilated area that allows patients to be separated by 6+ feet

Patient Assessment

The healthcare provider should assess the patient (using Standard, Contact & Airborne Precautions, including use of eye protection) in a private room with the door closed, ideally an airborne infection isolation room.

During the assessment, please collect the following information:

- 1. Respiratory symptoms
- 2. Vital signs including measured or subjective fever
- 3. Date of illness onset
- 4. Location and date of travel to China
- 5. Description of any contact with ill persons in China
- 6. Description of any contact with the healthcare system in China

If symptoms are present and travel history is re-affirmed, please contact the lowa Department of Public Health who will provide guidance on whether testing is needed. **During business hours call 800-362-2736 or after hours call 515-323-4360 (ask State Patrol to page the epi on call).**

If testing is approved, IDPH and SHL will provide sample collection guidance and specimens transport will be arranged. Currently all testing must be performed at CDC; therefore testing will take at least 48 hours.

Environmental Cleaning

- 1. Routine cleaning and disinfection procedures are appropriate for 2019-nCoV in healthcare settings, including those patient-care areas in which aerosol-generating procedures are performed.
 - Management of laundry, food service utensils, and medical waste should also be performed in accordance with routine procedures.
- 2. Leave the room out of circulation for 2 hours.
